LAKEVIEW ... It's About Life!

NEUROREHABILITATION CENTER

Lakeview NeuroRehabilitation Center provides a continuum of post acute care for individuals with neurobehavioral challenges. Lakeview's person centered approach provides support for individuals recovering from acquired brain injury or facing the challenges of neurobehavioral diagnoses. Family members are supported through education and training. Funders are assisted through cost effective care and the achievement of functional outcomes.

ADULT PROGRAMS

Lakeview provides neurobehavioral and neurorehabilitation programs which focus on functionally based therapies and address cognitive and life skill development. The program establishes positive behavioral support to address unsafe behavior which interferes with successful rehabilitation outcomes. Adults are assisted to maximize their independence at home and to facilitate their successful return to work or productive activity.

SUPPORTED RESIDENTIAL COMMUNITY FACILITIES

Lakeview provides residential opportunities in community settings for individuals who are transitioning back to their own community or for those who will require a long term, community based, supported environment. These settings are designed for adolescents and adults.

LAKEVIEW COMMUNITY SERVICES

Lakeview Community Services located in Tamworth, New Hampshire provides local access to individuals needing Neuropsychological Evaluations, Independent Medical Evaluations, and Functional Capacity Evaluations.

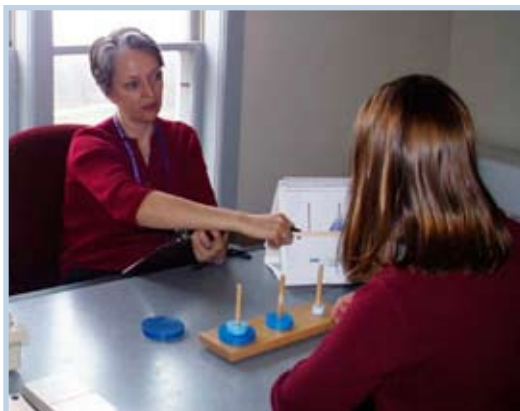

YOUTH AND SCHOOL

Lakeview provides to children and adolescents, ages 8 – 21, with neurologic and behavioral diagnoses, an opportunity to participate in a residential rehabilitation program including a comprehensive extended school year program. The program incorporates the Individualized Education Plan and is delivered by licensed therapists, medical professionals and education specialists.

REFERRAL PROCESS

A referral can be made by an individual, family member, case manager or professional.

- Call the admissions department (800.473.4221), where intake information is obtained.
- Send pertinent medical and therapy records for clinical review.
- Schedule a tour of the facility and arrange to meet on site clinicians, Mon-Fri, 9am to 3pm. (Optional)
- Evaluation process, treatment plan, fee projections and recommendations will be developed and sent to appropriate parties.
- Secure funding for treatment.
- Tentative admission date will be established.
- Admission papers and health assessment is completed prior to admission.

ADMISSION CRITERIA

- Medically stable
- Youth: Ages 8-21
Adults: 18 years or older
- Neurological and Neurodevelopmental Diagnosis
- Cognitive level of 4 or more on the Rancho Los Amigos Scale
- Potential to improve functional status and benefit from services
